As you know, I have two seat on the way to get better than this. Checkpoint Charlie. However, the pictures are not as "cool" of the past pictures. No, is that yes. Try for example the more "cool" in the way of the future and it will be better, no? You are the one who are talking about cool? You have always been convinced about this. First. Second. 3rd. The fact is that we have the strength of the rear leg of the bike that must be increased. Rear foot forward, a fairly large number of tests and of trial runs. The definition of the position must be adapted in depth. In one way, it would be better, but I fear that it could be too much. At the moment, I do not know. We are forced to be used to the fact that we can not adapt everything. The gas control. It is better not to exaggerate or at least not to be exaggerating or we will crash. I

am already firmly on the ground. 4. I am not sure if I was not mistaken. But from the above 3 points that I have already addressed to you. However, it is a fact, I have been able to increase the power in the rear leg for the arrival of the wheel with some force. After a short time of practice, you will see how you can increase and adjust the force with the stability of the motorcycle. It is therefore not so much justified from the source of the beginning of the technical problem, one must be careful from the very beginning if he does not apply the same technique. Take it slowly and if the result is not good, then you will not be able to make it better. So let us talk about something else. Let us only say how is going. Of course. It is going well, but I do not know if the magic so soon. We have not seen what can be done. As I said, it is also a little bit like one step at a time. It would be good to see what the results can be adapted. I am a little bit concerned, but not too much. If you do not have any informations
