About This Game

Never Split the Party is an ultra social rogue-like! You're **one of four adventurers** entering an epic dungeon to take down the evil vampire known only as **The Countess**, who killed your parents and is now constantly bombarding you with insults.

Explore a procedurally generated dungeon, **amass** powerful upgrades, and **cooperate** with your fellow adventures to **conquer** and **crush** the vile dungeon bosses!

Never Split the Party has over **120** upgrades, **21** magical potions, **28** unique enemies, and over **425** room designs spread among **5** procedurally generated dungeon levels for maximum replayability!

Roles

Each player has both a **role** and a **character class**.

The **four unique roles** in the game each provide vital info to the party.
- **The Cartographer** tracks the dungeon **maps**.
- **The Treasurer** tracks each players **inventory**.
- **The Vitalist** tracks each players **health**.
- **The Loremaster** tracks all knowledge of the **upgrades**.

If you were to be split from the party, say through an **Skeleton Wizard's** teleportation or a **Punter** that knocks you into the next room, then everyone else would lose access to your roles vital info until you're reunited.

Classes

You'll also get to choose your **character class**. The **Fighter** and **Cleric** classes are available for everyone (so that you can **always play with your friends**).

Access to the other classes as well as **Challenge Modes (including PvP)** and **Bonus Armor and Helmet Cosmetics** are available with the Fellowship Unlock.

More crash fixes.
Updated localizations.
Freeze rotation on upgrades.
Fixed several crashes.
More crash fixes.
More crash fixes.
Fixed crash on exit of controls menu.
Worked on saving custom key binds.. **Cleric Class Unlocked!**:
Since launching last week we've had some fantastic success with the game being enjoyed by many players. We've had 70,000 downloads and our peak concurrent players was over 500. Lots of you really seem to enjoy the game.

There have been some complaints about our business model. We want to do a shareware like model, where everyone can always play with their friends. Then if you want you can unlock the rest of the content with a one time purchase. We didn't want to do crates and keys and turn the game into a hat store.

Making money was not our primary motivation for making Never Split the Party. But we would like to make enough to justify continued investment. We have many plans to expand the content of the game.

We are making the Cleric class free! Playing as a Cleric makes the game easier because she is focused on defense. You don't die as easily and your team will survive longer with a Cleric on the team.

We're planning on adding more classes to the Fellowship Full Game Unlock, as well as adding challenge modes for additional replayability and increased difficulty. The challenge modes are planned to require the Fellowship Full Game Unlock for the host of the game.

Most of our negative reviews are from non-english languages, so we've also been working hard to improve our localization support. We apologize to those that have experience bugs. Please be patient with us as Never Split the Party is in early access.
